

You do not understand how important Indiana's telemarketer no call list law is to Indiana residents. Our own Fire Department tried to block the law, that is until they realized that over a million people had signed onto the list. Talk about voting! You will have millions of angry citizens to contend with if we start receiving telemarketer calls again.

After the law was finalized, I have received exactly two calls, and that was from telemarketers in Canada trying to circumvent our law. We as United States citizens have voted our mind, we DO NOT want intrusive calls coming into our homes. We have to contend with enough annoying commercials, marketing ads, etc. from every conceivable source. Please let us have peace in our own homes.
